Limekiln Optimisation Virtual Consultation

It has been almost two years since Limekiln Wind Farm was consented and detailed construction planning commenced. In that period several things have happened including a review of the transmission charging regime (called TNUoS) by Ofgem and the Section 11 refusal to temporarily close the core path by Highland Council.

In order to deal with these issues, Infinergy is now looking to fully revise the wind farm's track design as well as increase the turbine sizes in line with the turbines proposed for Limekiln Wind Farm Extension. To do this, the planning process requires the submission of an application to vary the existing consent called a 'Section 36C application'. This requires a revised Environmental Impact Assessment, which will be put out to consultation in due course.

Under normal circumstances, Infinergy would host local Community Open Days locally to ensure the local community is fully consulted on the plans, however, the pandemic has meant that all of this type of consultation has had to move online. To that end, a virtual consultation page will be included on the website and will be live from 11th May until 4th June. There will be a feedback form and a number of live 'chat' sessions for virtual visitors to discuss the proposal with the team at www.limekilnwindfarm.co.uk on the 18th and 19th of May and again on the 1st and 2nd June from 2-4pm and 6-8pm each day.

-Ends-

NOTE for EDITORIAL STAFF

Infinergy

Infinergy is a UK based renewable energy company, active in the UK, The Netherlands and Australia with a strong focus on the development of onshore wind energy in Scotland. Infinergy develops wind and solar energy projects from inception through to construction and operation. In the UK we develop most of our projects in close cooperation with Boralex. For more information visit <http://www.infinergy.co.uk>.

Boralex

Boralex develops, builds and operates renewable energy power facilities in Canada, France, the United Kingdom and the United States. A leader in the Canadian market and France's largest independent producer of onshore wind power, the Corporation is recognized for its solid experience in optimizing its asset base in four power generation types—wind, hydroelectric, thermal and solar. Boralex ensures sustainable growth by leveraging the expertise and diversification developed over the past 25 years. Boralex's shares and convertible debentures are listed on the Toronto Stock Exchange under the ticker symbols BLX and BLX.DB.A, respectively. More information is available at www.boralex.com or www.sedar.com.
